DETAILED ACTION

Acknowledgment is made of the amendment filed 8/9/02. Claims pending are 1-31. Claims 5 and 14 remain withdrawn from consideration. Claims 1-4, 6-13, and 15-31 stand rejected.

Double Patenting

1. The rejection of Claims 1-31 under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-40 of U.S. Patent No. 6,251,373 is maintained for the reasons of the record.

Claim Rejections - 35 USC § 103

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. The rejection of Claims 1-4, 6-13 and 15-31 under 35 U.S.C. 103(a) as being unpatentable over either Hansenne or Allard et al. in view of Huglin et al. is maintained for the reasons of the record.

Response to Arguments

4. Applicant's arguments filed 8/9/02 have been fully considered but they are not persuasive.

In response to the Applicant's arguments with respect to the obviousness-type double patenting rejection, it is noted that the additional sunscreens compound of Candau'373 is not excluded by the open-end language of the instant claims. Further, the Applicant argues that "Candau is silent as to water remanence-enhancement." In response, it is noted that the

Art Unit: 1616

amounts of benzotriazole and bisresorcinyltriazine compounds in Candau's compositions overlap with those instantly claimed.

With respect to the §103(a) rejection, the Applicant argues that "both Hansenne and Allard stress that it is the combination of their particular components which synergistically produces enhanced SPF. One of skill in the art would therefor not be motivated to substitute any component thereof with the bis-resorcinyltriazine of Hüglin because to do so would likely ruin the SPF obtained absent such substitution." In response, it is noted that nowhere in the Office Action, the Examiner suggested that one of skill in the art would be motivated to *substitute* the sulfonic/benzimidazole compounds of Hansenne with the claimed triazines. Hansenne teaches that the sunscreen compositions according to her invention may contain triazine derivatives *in addition to* the synergistic mixture of benzotriazole-substituted silicone compounds and sulfonic/benzimidazole compounds. See col. 7, lines 9-13 and 16. With respect to the Allard reference, it explicitly teaches compositions containing a 1,3,5-triazine derivative and a silicone compound containing benzotriazole substitution. See Abstract. While the 1,3,5-triazine derivatives of Allard et al. are different from the Applicant's elected species of triazines, they are structurally similar and used for the same art-recognized purpose. Therefore, it is the Examiner's opinion that, absent a showing to the contrary, it would have been obvious to one having ordinary skill in the art at the time the claimed invention was made to use bis-resorcinyltriazine of Huglin et al. for cosmetic sunscreen compositions of either Hansenne or Allard et al. for its art-recognized purpose and with a reasonable expectation of deriving the same cosmetic effect as set forth in the art.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
